FROM THE LIBRARY DIRECTOR
NIH Public Access Policy

In September of 2004 the National Institutes of Health (NIH) proposed a policy to improve public access to journal articles published as a result of NIH-funded research. The proposed policy would have required that researchers submit electronic copies of their final manuscripts, based in whole or in part on NIH-funded research, to the National Library of Medicine’s PubMed Central (PMC) database within six months of acceptance for publication in a peer-reviewed journal. The main goals of the policy were:

- to make the published results of NIH-funded research more readily accessible to researchers, educators, health care professionals and the public
- to provide a searchable database of the publications, and
- to ensure the preservation of research findings.

The NIH received more than 6,000 comments on the proposed policy during the comment period, which ended on November 16. Comments were largely supportive of the proposed policy, with many expressing concern about the high cost of journal subscriptions. Some of the concerns about the policy included the potential for redundancy with existing systems, the expense of maintaining the PubMed Central database, and the potential financial impact on current publishers of scholarly journals, including professional associations and societies.

The revised policy (http://grants.nih.gov/grants/guide/notice-files/NOT-OD-05-022.html), which was released by NIH on February 3rd and will take effect on May 2nd, recommends that researchers submit their articles to PMC within twelve months of acceptance for publication, rather than requiring deposit within six months. NIH also indicated that compliance with the policy is strictly voluntary, noncompliance will not be tracked in any way, and that there will be no repercussions for researchers who choose not to comply.

NIH also released a document (http://www.nih.gov/about/publicaccess/index.htm) discussing the implementation of the policy. However, many details remain to be determined as NIH works with all stakeholders to refine the process and evaluate the outcomes. An NIH Public Access Advisory Working Group will be established by the National Library of Medicine Board of Regents to advise NIH on implementing and assessing the policy. As more details become available, they will be posted on the PMC website (www.pubmedcentral.nih.gov) and publicized in this newsletter. While the policy is not as definitive as many had hoped it would be, it is at least a step forward in improving access to scholarly information.

Mary L. Ryan,
UAMS Library Director
JOURNAL OF NEUROINFLAMMATION LAUNCHED BY TWO UAMS FACULTY

Drs. Robert Mrak (Chief of Neuropathology at UAMS) and Sue Griffin (Vice-Chair of Geriatrics at UAMS) launched the Journal of Neuroinflammation, a new, online, open-access journal, in April of 2004. In the first nine months of publication the new journal has attracted 50 manuscripts and published 27 papers, making JNI one of the top 5 of 62 'independent' journals published by BioMed Central, the original open-access publisher. The most popular paper, authored by Dr. Wolfgang Streit of the University of Florida, has already been viewed or downloaded over 2,500 times.

'Neuroinflammation' is an encapsulization of the new idea that microglial and astrocytic responses and actions in the central nervous system have a fundamentally inflammation-like character, and that these responses are central to the pathogenesis and progression of a wide variety of neurological disorders. Much of the work contributing to this new vision has taken place at UAMS, involving Drs. Griffin and Mrak, Dr. Steve Barger (who is on the Editorial Board of the new journal) and others. Over the past decade, this idea has revolutionized our understanding of Alzheimer's disease, where it originated, and now has applications to other neurodegenerative diseases, to ischemic/toxic diseases, and even to normal brain development. The new journal is the first to represent this new field, and has received an enthusiastic response from workers in this area.

Open-access publishing makes full-text online and pdf versions of published manuscripts freely available to anyone, anywhere, with an internet connection. There are no fees, no passwords, no subscriptions, and no limitations on dissemination of published material. This publishing model, pioneered by JNI's publisher, BioMed Central, has revolutionized scientific publishing and availability of published work. In the USA, this has attracted Congressional attention, where there is a move to promote open-access publication of all NIH-sponsored research.

Another advantage of online publication is rapid manuscript turnaround. The average time from manuscript submission to online publication at JNI is currently 42 days, with a fastest time-to-publication of 15 days. One recent manuscript submission to JNI was accompanied by this comment: "We are submitting to your relatively new journal because of the quality of articles recently published, our support for the open access concept, and our hopes to obtain a rapid review [and] publication. We note that [two] recent publications . . . required less than 1 month [for review and publication]."

UPDATE YOUR INTERLIBRARY LOAN INFORMATION (ILLIAD)

With the implementation of charges on January 1, 2005 for interlibrary loans, ILLiad users need to update their accounts to reflect a method of payment and, when applicable, to include a department account number (IDT). When this information is provided in your ILLiad record, it allows us to process your request more quickly.

Instructions for Creating and Modifying ILLiad accounts:

If you are already registered on ILLiad go to http://www.library.uams.edu and click on Interlibrary Loan services. This will take you to the logon screen for ILLiad.

1. Log on using your ILLiad username and password. This will take you to the main menu of your account.
2. Scroll to the bottom of the screen and click the “Edit User Account” button. This will take you to the current account screen.
3. If you don’t have an account listed scroll to the bottom of the screen and you will see a box with the title “Add Account”. This is where you need to enter your account information. Once you have entered everything click on the button to your right marked “Add Account”.

To edit/delete an account on ILLiad:

Follow steps 1-3 above.

1. If you want to edit the account number you have listed you will need to scroll to the bottom of the screen where you will see a box with the title “Add Account”. Put your new information in this box. Then click the button to your right with the title, “Add Account”.
2. This will take you back to the top of the screen. You will see your old account information and your new account information. If you don’t want to keep your old account information just click on the button to your far right titled “Remove”. This will remove your old account number.

If you need any assistance please don’t hesitate to contact us via email libraryinterlibraryloan@uams.edu or by phone at 501-686-6742.

LIBRARY’S ANNUAL BOOK SALE – MARCH 10, 2005

The Library will hold its annual used book sale on Thursday, March 10th, in the lobby of the Education II Building, from 8:30 a.m. until 1:30 p.m. Included in the sale will be books removed from our collection and books and other items received as gifts. We’ll have a small group of “recreational” books as well as the health sciences books. Most books will sell for $1.00 and the proceeds will be used to support the Library. If you have books you’d like to donate for the sale, please contact Mary Hawks, hawksmarys@uams.edu.

Come and find a treasure!

Library Book Sale
SEARCHING FOR TESTS AND INSTRUMENTS

Are you looking for tests, questionnaires, surveys, or instruments to measure health, education, and/or behavior?

Searching for tests can be an overwhelming task if you are not sure where to begin. The following are some facts and time-saving tips to help you get started.

There are two types of categories tests fall into:

- **Unpublished tests** are usually the easiest to locate. There are many unpublished tests available which can be searched in the journal literature, in books, or if you are lucky you can find them online. In most cases, you will often find reviews of tests. However, if you find an unpublished test it is sometimes necessary to ask permission from the author(s) to administer them.

- **Published tests** are copyrighted and usually available through a commercial publisher for a fee. They are not readily available through searching the journal literature or online resources. You can usually find critiques or reviews of published tests in reference sources, but to access the full instrument and administer it you must obtain permission from the publisher.

**Online Sources**

There are journal literature databases you can search from the UAMS Library to find instruments and reviews. For additional searching tips, please contact the UAMS Library’s Reference Department: 686-6734 or libraryreferencedesk@uams.edu.

Select the individual database from the list of resources: [http://www.library.uams.edu/resources/databases.aspx](http://www.library.uams.edu/resources/databases.aspx)

- **OVID, Health and Psychosocial Instruments (HaPI)** 1985- December 2004

$1000 AVAILABLE FOR HISTORICAL RESEARCH IN 2005

The History of Medicine Associates, an organization created to promote interest in the history of the health sciences in Arkansas and to support the Historical Research Center of the UAMS Library, is offering a $1000 research award to an individual interested in preparing a paper on any aspect of the history of the health sciences in Arkansas.

Individuals should make use of the resources in the UAMS Historical Research Center collection when preparing the paper. The award may be used for travel, housing, resource material, research, and secretarial assistance.

There is no required application form. The proposal application must include a brief abstract (100 words), statement of significance, summary (1-2 pages), detailed budget, anticipated completion date, and brief resume or curriculum vitae. The deadline for receipt of applications is May 31. The award recipient is announced in June.

Application guidelines may be viewed at http://www.library.uams.edu/HRC/award.aspx or requested from:

Amanda Saar, Treasurer
History of Medicine Associates
UAMS Library, Slot 586
4301 West Markham St.
Little Rock, AR 72205-7199 or call (501) 686 6733.

UAMS LIBRARY DIRECTOR APPOINTED TO NIH PUBMED CENTRAL NATIONAL ADVISORY COMMITTEE

Mary Ryan, Director of the UAMS Library, has been appointed to serve a three-year term on the NIH PubMed Central National Advisory Committee (www.pubmedcentral.nih.gov/about/nac.html). She is the only health sciences librarian on the Committee. The Committee will advise the NIH on the content and operation of the PubMed Central (PMC) repository of online journal articles, will establish criteria to certify groups submitting materials to PMC, monitor PMC operations, and ensure that PMC responds to the needs of researchers, publishers, librarians and the public.

Several months ago, Ms. Ryan was also one of four librarians from the US invited to participate in a BioMed Central consultation workshop held in London to discuss the crisis in scholarly publishing and potential pricing models for open access journal publishing. BioMed Central (www.biomedcentral.com) is currently the largest open access publisher of biomedical journals. Other participants in the workshop included librarians from several European countries and representatives of some European biomedical research funding agencies. For more information on open access journals, see the scholarly publishing updates and webliography on the UAMS Library’s website at www.library.uams.edu/schpub/schpublish.aspx.
