Mary Ryan Receives Dale Bumpers AHEC Leadership Award

Mary L. Ryan, MLS, AHIP, has served as director of the UAMS Library since April of 1997. Her leadership and cooperative spirit with the AHEC libraries have been instrumental in ensuring that the AHEC libraries have become true extensions of the UAMS Library. Her view of the AHEC libraries is reflected in local health professionals statewide, who see the AHEC libraries as a vital source of current information practices.

On Dec. 14, at the AHEC Regional Programs Banquet, Mary Ryan was awarded the Dale Bumpers AHEC Leadership Award. She was presented the award by Dr. Cranford on behalf of the Arkansas AHEC Program.

The Dale Bumpers AHEC Leadership Award was created to recognize exemplary leadership that results in outstanding achievement of AHEC Program goals, specifically, leadership sustained over considerable time and having significant impact on the statewide program.

Dale Bumpers was Governor of Arkansas, 1970-1974, and a U.S. Senator from Arkansas, 1974-1998. Upon election as Governor, he took several steps to remedy the state's health care problems, one of which was to establish the AHEC Program in 1973. Through the years as U.S. Senator, he strongly supported federal AHEC Program efforts and helped secure federal funding that allowed expansion of the Arkansas program.

New Look for Citrix

If you use Citrix for lecture materials containing copyrighted images or for remote access to programs provided by the Learning Resources Center, some things have changed. The website has a new look and a new address due to an upgrade to Presentation Server 4 in December, 2006.

The previous login address was http://liblrctx.uams.edu and it looked like this:

The new address is http://liblrctx.uams.edu/Citrix/MetaFrame/auth/login.aspx and you should see:

Tips for accessing materials on Citrix are:

- You must use Internet Explorer as your web browser! The ICA Client that is required to open any of the materials for a course on the website will only install in Internet Explorer. Sorry Firefox and Safari users!
- In order for the ICA client to be installed, you must
  - Disable any pop-up blockers you have running. Internet Explorer has a built-in pop-up blocker that you can find under Tools, then Pop-Up Blocker, and then Turn off Pop-Up Blocker. If you have a Google or Yahoo toolbar installed, they also have a built-in pop-up blocker.
  - You must also enable ActiveX for Internet Explorer. You can do this by clicking on Tools, then Internet Options, and then the Security tab. Then click the Custom Level button, select “Low” in the setting dialog box, click Reset and then OK. You can change your setting back to medium or medium-low after the ICA client is installed.
  - Be sure to look for the ICA client User Agreement and click YES after you login and select the application to run.

You cannot link to Citrix from a course within WebCT! The security settings for WebCT (secure socket layer) will not allow you to access to the Citrix site. Always open up a new Internet Explorer window, and enter the URL for the Citrix site (http://liblrctx.uams.edu/Citrix/MetaFrame/auth/login.aspx). You can then bookmark the Citrix site URL for future use.

Contact Loretta Edwards, LRC Network Manager, at edwardslorettaj@uams.edu or call 686-6738 if you have questions or need further information about using Citrix, if you cannot get the ICA client to install from the Citrix login page and need manual installation directions, or you need information pertaining to specific login accounts for courses on Citrix.

Notes and News

CHS Protocols Now Online for UAMS

UAMS campus now has online access to the *Cold Spring Harbor Protocols*. The CSH laboratory manuals for molecular and cellular biology have been extremely popular as printed books with a tradition of 60 years behind them. *CSH Protocols* online continues with that tradition, creating a source of trusted techniques that are now collected and made available online where they can be continuously expanded, updated, and annotated by the originators and users. This database of research techniques for cell and molecular biology, genetics, bioinformatics, protein science, and imaging is fully searchable by keyword and subject. Its coverage includes cell and molecular biology, genetics, bioinformatics, protein science, and imaging. *Cold Spring Harbor Protocols* is available from the Library’s EResources web page.

If you find this a useful database, please send feedback to Mary Hawks Collection Management Librarian hawksmarys@uams.edu.

UAMS Library Annual Used Book Sale

The Library will hold its annual book sale Thursday, March 1st, 8:30 a.m. - 1:30 p.m. in the Lobby in front of the Library, ED II. Most books will be sold for $1. The proceeds will be used to support Library services. Come early for the best bargains!

Please contact Mary Hawks if you have any questions, 686-6749
Lexi-Comp® ONLINE

Lexi-Comp: Online, PDA, and BlackBerry Drug Reference
Clinical Pharmacology cancelled as of March 27, 2007

Lexi-Comp has replaced Clinical Pharmacology as the primary drug reference resource provided by the UAMS Library. Lexi-Comp Online is available on campus as well as off-campus to all UAMS faculty, students, and staff from the Library’s EResources web page. Lexi-Select, a selection of the most important clinical care components of Lexi-Comp, is also available for PDAs.

Lexi-Comp provides the equivalent or greater information than Clinical Pharmacology with an easier to use interface than Clinical Pharmacology. Lexi-Comp was highly rated by members of the Library’s Clinical Resources Team that advises the Library in selection of clinical resources. In addition, Lexi-Comp is the primary drug reference for Arkansas Children’s Hospital and was selected by the UAMS College of Pharmacy as a PDA drug reference for upperclassmen. Lexi-Interact, the drug interaction module of Lexi-Comp, is also available within UptoDate clinical resource.

Clinical Pharmacology Online and its PDA versions will no longer be available from the UAMS Library after March 27, 2007. Over the past 10 years, Clinical Pharmacology has developed many loyal users who will be pleased to find that the Clinical Pharmacology drug monograph and patient education materials continue to be available through EBSCOHost and AccessMedicine Resources on the Library Website.

Unfortunately the PDA and Blackberry versions of Lexi-Select are not available for free as was the PDA version of Clinical Pharmacology. However, the UAMS Library has negotiated a $50 annual fee for either a Palm, PocketPC, or Blackberry version of Lexi-Select for students, residents, and full-time faculty. Please check the PDA Resources page for further information.
