UAMS Library Renovation Continues: New Circulation Desk

As a final phase of the Library renovation projects, the Library circulation desk is being replaced with a smaller, more efficient desk. There will also be an overhead canopy to help reduce noise. The project is scheduled to be completed by August 1.

The Library website, Facebook page, and Twitter feed will be updated with noise alerts on days when construction noise will be expected. During this time, quieter study areas can be found in the group study rooms on 2nd and 3rd floors, the 3rd floor south study area and 5th floor.

**Book About Early Arkansas Physician Published**

*Fiat Flux: The Writings of Wilson R. Bachelor, Nineteenth-Century Country Doctor and Philosopher*, edited and introduced by William D. Lindsey, is now available from the University of Arkansas Press ([http://www.uapress.com/titles/sp13/lindsey.html](http://www.uapress.com/titles/sp13/lindsey.html)). The book contains a forward written by Dr. Tom Bruce, a letter from Senator Dale Bumpers, and an afterword by Dr. Jonathan Wolfe.

Dr. Bachelor moved to Arkansas after being the physician in charge of the burial of bodies at the national cemetery built at Shiloh, Tennessee following one of the bloodiest battles of the Civil War. He practiced medicine in Franklin County and kept a diary of his cases for 30 years. He was also a philosopher who wrote numerous articles for local newspapers on topics ranging from religion to women’s rights. Dr. Bachelor believed in a concept he called *fiat flux*, “an awareness of the ‘rapid flight of time’ that motivated him to treat the people around him and the world itself as precious and fleeting.” The book includes a lengthy introduction describing Dr. Bachelor’s family history and activities throughout his lifetime, as well as a transcription of the diary, letters, and newsletter articles he wrote.

The UAMS Library and its Historical Research Center staff became interested in the development of the book following a visit from Dr. Lindsey and his cousin William Russell, both descendants of Dr. Bachelor, and a presentation they made at the Society for the History of Medicine and the Health Professions annual dinner meeting in 2009. Staff provided some research assistance and helped the authors identify an appropriate publisher. The descendants of Dr. Bachelor generously donated his diary to the Library’s Historical Research Center in 2011 to be conserved and shared with others.

We are pleased that *Fiat Flux*, which provides valuable information about the practice of medicine, and about society in general, in western Arkansas in the late 1800’s, is now available.

- Mary Ryan, Library Director

**Impact of Sequestration on the National Institutes of Health**

NIH recently reported that, due to sequestration, approximately 700 fewer competitive research project grants will be issued this fiscal year. See the NIH Fact Sheet for further information about the impact of sequestration on the National Institutes of Health. A link to the Fact Sheet is available on the UAMS Library’s NIH Public Access Policy webpage: [http://www.library.uams.edu/schpub/nihpolicy.aspx](http://www.library.uams.edu/schpub/nihpolicy.aspx)

Library Drop in Classes

The Library is now offering Drop in Classes for UAMS faculty, staff, and students. The one-hour sessions are taught in-person and cover a variety of topics. These free classes are offered in the Video Conference Room (formerly Access Grid Room) on the 3rd floor of the Library twice a month: the 2nd Tuesday at 10:00am and 4th Thursday at 2:00pm.

The classes offered in June and July are:

- **Tuesday, June 11, 2013, 10:00am**
  Introduction to Excel

- **Thursday, June 27, 2013, 2:00pm**
  Introduction to RefWorks

- **Tuesday, July 9, 2013, 10:00am**
  The Teaching Resource Center - Where Teaching Meets Education

- **Thursday, July 25, 2013, 2:00pm**
  Focus on the Busy Researcher or Clinician: Free Literature Search Services, NIH Public Access Policy Assistance, and more...

To see the complete schedule and the full range of available topics, go to the Class website at [http://library.uams.edu/services/classes.aspx](http://library.uams.edu/services/classes.aspx).

One-on-one or small group sessions can be scheduled as needed. Choose from the list of available topics or request a session tailored to a specific need. Use the Online Request Form at [http://library.uams.edu/forms/class-request.aspx](http://library.uams.edu/forms/class-request.aspx) or call Reference at 501-686-6734 for more information.

UAMS Library Outreach in the Community

During the last year the UAMS Library has been involved with several activities that support the 12th Street Health and Wellness Center. The first project improved patient and provider access to authoritative health information by purchasing a printer, an iPad, and two netbook laptops for the center. Funds were provided by a competitive award from the National Network of Libraries of Medicine/South Central Region. Loretta Edwards, Jon Goodell, and Jan Hart worked with Lanita White, Pharm.D., Director of the Center to provide health information resources for two community outreach events. Dr. Hart is also a member of the Center’s Advisory Board.

A computer, monitor, and printer were donated by the Library to the Center for a patient information kiosk. The web browser was configured to open to the Free Health Information page of the Library’s web site as a starting point for patients looking for authoritative health information. Lanita shared an experience she had recently helping a patient find and print information from the kiosk on using a nebulizer. A nebulizer is a device used for delivering medication to the lungs. The patient’s daughter, who has asthma, was prescribed this treatment for home, but she did not know how to use the equipment properly. The patient was able to find the information she needed online and print it to take home.

For National Library Week in April, the Library collected children’s books, coloring books and crayons, puzzles, and magazines for the waiting area at the Center. The House of Delegates also sponsored a book drive the same week and was able to donate 500 books to the Center. At the same time a plan was put in place to have a reading corner in the Center to help support literacy for the children in the neighborhood. Dr. Jonathan Wolfe and his wife Donna, along with others from the College of Pharmacy, made this special reading corner possible with their time and financial contributions. On June 12, 2013 the READ corner was unveiled and dedicated. Children visiting the Center will not only be able to read the books during their visit, but they will also be allowed to take books home.

- Loretta Edwards
Visit to the National Institutes of Health and National Library of Medicine

UAMS Librarian Jon Goodell visited the National Institutes of Health and the National Library of Medicine June 3rd - 5th. He traveled with fellow librarians Jason Bengston, of the University of New Mexico Health Sciences Library and Informatics Center, and Mark Hopkins, Technology Manager of the Robert M. Bird Library at the University of Oklahoma Health Sciences Center.

The visit was funded in part by a competitive award from the South Central Academic Medical Libraries Consortium and gave an opportunity to learn more about the Semantic MEDLINE database. Semantic MEDLINE is a visual literature-based discovery tool used for identifying previously unrecognized relationships in biomedical literature. It provides a new approach for hypothesis generation and creativity enrichment.

To learn more about Semantic MEDLINE contact Jon Goodell at 501-526-5461, jgoodell@uams.edu. You can also view a demo at http://skr3.nlm.nih.gov/SemMedDemo/.

- Jon Goodell

UAMS Library Adds Two New Journal Titles

The Library recently added two new journal titles, the Journal of Pediatric Urology, sponsored by COM Urology Department and the Journal of Graduate Medical Education.

We would like to thank all of the Departments who sponsor journal or database subscriptions on behalf of the campus:

- Henry Stewart Talks (Biomedical and Life Sciences Collection streaming videos) - Paid by the Graduate School and Library
- AccessPharmacy - Limited user access paid by the College of Pharmacy. A new unlimited-access license paid by the College of Pharmacy and the Library begins Fall 2013
- Arthroscopy - Paid by the College of Medicine Department of Orthopaedic Surgery
- Journal of Pediatric Urology - Paid by the College of Medicine Department of Urology

- Daphne Hyatt
Scholarly Publishing Update

The NIH announced in February that it will delay processing of awards for authors/PI’s who are not compliant with the NIH Public Access Policy. The policy requires that articles resulting in whole or in part from NIH funded research be deposited in PubMed Central, a freely available online repository of full-text articles maintained by the National Library of Medicine, within a year of publication. The UAMS Library participated in a pilot project with NIH to help develop a tool which enables institutions to track their NIH-funded researchers’ compliance. Susan Steelman and Jessie Casella produce monthly compliance reports for the Vice Chancellor for Research and for department heads who want to track compliance for members of their departments. These reports include a list of all articles currently out of compliance and the PI’s for grants connected to those articles. While the UAMS compliance rate is now about 85%, which is higher than the national average of about 77%, it is important for all NIH-funded researchers to be in compliance to avoid being denied future NIH funding. **Funds will be withheld from non-compliant investigators.**

Also in February, the White House’s Office of Science and Technology Policy issued a directive requiring that all federal agencies providing more than $100 million annually in research and development funding submit a proposal by the end of August outlining how they will increase public access to the results of research they fund. Agencies affected include the Department of Health and Human Services, the Centers for Disease Control and Prevention, the Health Resources and Services Administration, the Agency for Healthcare Research and Quality, the Food and Drug Administration, and several others. The directive also includes providing access to scientific data in digital formats. The OSTP will review the proposals and develop guidelines for the development of final plans for each agency.

On the legislative front, Representative Doyle of Pennsylvania and Senator Cornyn of Texas introduced the Fair Access to Science and Technology Research Act (FASTR), which promotes greater access to research information and data. If enacted, FASTR would reduce the time period for depositing articles from twelve months to six months, it would permit repositories other than agency-maintained ones, and it would require that papers and related data enable “computational analysis by state-of-the-art technologies.”

It is important to remember that all of these initiatives have a common goal, which is to accelerate scientific discoveries and innovations. More information about these initiatives is available on the UAMS Library’s website at [http://www.library.uams.edu/schpub/schpublish.aspx](http://www.library.uams.edu/schpub/schpublish.aspx).

If you have questions about the NIH Public Access Policy, compliance status or copyright questions, please contact Susan Steelman at 686-6737, [scsteelman@uams.edu](mailto:scsteelman@uams.edu), or Jessie Casella at 686-8517, [jcasella@uams.edu](mailto:jcasella@uams.edu).

UAMS Library Staff Attend 2013 ALPS Conference

Three staff members from the UAMS Library, April Hughes, Schemeka Lacey, and Loretta Edwards attended the 2013 Arkansas Library Association’s Paraprofessional Division (ALPS) Spring Conference in Hot Springs, Arkansas May 13-15. This year’s theme “Roaring through the 20’s with ALPS” included a tour and program at the Hot Springs Gangster Museum and a Roaring 20’s murder mystery theater.

Gail Johnson and Pam Parr, the keynote speakers from Face to Face Communications gave three presentations on communication in the workplace including real-world scenarios for improving communication and productivity.

Sessions for Public and Academic Libraries’ needs, Circulation, Reference, and Cataloging were available both Tuesday and Wednesday. Heather Smith, Head of Academic Support and Systems in the UAMS Library, presented a session on Tuesday on leadership roles in the library.

The 2013 Teaching with Technology Symposium will be held July 18-19. The event is open to all educators and technology enthusiasts. This year’s symposium will be hosted at both UAMS in Little Rock and UAMS Northwest in Fayetteville. The two locations will share some presentations and workshops via interactive video network (IVN), and other presentations and workshops will only be available at one site.

The Symposium will feature workshops, lightning sessions, discussion panels, and demonstrations. This year’s keynote speaker is University of Arkansas System President, Dr. Donald R. Bobbitt.

For more information, including the complete symposium schedules and links to register see http://www.twtsymposium.com/. 
New eBooks in the UAMS Library
